

## Our Pricing Schedule

We have a unique method for pricing our services because we do not charge by the hour for our services as a typical IT company might. All of our schools pay a flat monthly rate determined by each school's specific requirements. Pricing is largely determined by the frequency of on-campus visits to the school and the responsiveness to requests expected by the school.

All of our pricing levels include unlimited remote support for your staff, so they are free to contact us directly without your involvement for any technology concern or request for help, even on nights and weekends.

We are committed to a long-term relationship with your school and we want to contribute to your success. We are the fully staffed IT department you cannot afford to hire yourself, so we "time-share" our skills with the schools we support.

**One day per week visits: \$4,200/month**

**One day every-other-week visits: \$3,000/month**

**One ½-day per week visits: \$3,000/month**

**One ½-day visit every-other-week: \$1,750/month**

**Once per month visit or Small School (less than 200 students) – \$1,000/month**

**For information on the eligibility of your school and our as-needed services, please reach out to Clayton Whitaker ([clayton@emergeconsultinggrp.com](mailto:clayton@emergeconsultinggrp.com))**

In addition to our regular on-campus visits we also make more frequent visits for special projects or emergency visits to deal with special or emergency concerns, all of which is included in the above monthly fees.

Remember we also do not bill our customers for hotel, meals, and other travel expenses associated with supporting their schools. The flat rate is all you will ever pay for our services.
